

Dry Clean Concepts

The Dry Clean Concept - Dry Clean Concepts, Inc. offers consulting and knowledge to the person looking to become an owner/operator.

We have spent over 40 years analyzing the best approach for you to immediately establish a successful business in this dynamic industry. This is how the Dry Clean Concept works.

Our business systems, physical size, specialized equipment, plant design and production efficiencies allow our stores to produce and inventory the equivalent of (6) six regular, full price cleaners. Most beneficial being that this is all done under one roof.

Our stores are equipped with state of the art, eco friendly, microprocessor controlled dry cleaning, laundry, and pressing equipment.

These advantages mean lower cleaning fluid costs, less man hours and more quality garment care. All of our recommended equipment meets or exceeds all OSHA and EPA requirements. These advantages are coupled with our proven systems & will consistently produce a high standard of quality, at a lower price, and draw customers from a much larger demographic.

If you are serious about owning your own dry cleaning business but don't want to be limited by a franchise, we would love to speak with you. By owning your own pre-pay cash business, you are insulated from things like recessions and working for someone else. Most importantly, you are offered a turn-key business that can provide a substantial return on your investment.
